EXPERIENCE

ACUVISOR INSURANCE BROKERS PVT LTD. | FRONTEND DEVELOPER

Jun 2024 – Jul 2025 | Jaipur, Rajasthan | Remote

- Designed and implemented end-to-end frontend flows for multiple insurance categories including motor, pet, and term insurance – covering quote, product listing, KYC, proposal, payment, and policy generation.
- Built a responsive user dashboard with features to view and update profiles, access policies, and manage policy history.
- Integrated AcuBunny, an AI-powered insurance chatbot, to provide product recommendations and personalized assistance within the application.

ACUVISOR INSURANCE BROKERS PVT LTD. | INTERN

Feb 2023 – Jul 2023 | Jaipur, Rajasthan | Onsite

- Built and integrated end-to-end APIs for Health and Personal Accident insurance flows, covering quote, proposal, payment, kyc and policy generation using React.js.
- Optimized the large proposal form page where Formik caused all fields to re-render on each input, often hanging the site; replaced it with React Hook Form and modularized the form to prevent full re-renders and ensure smooth user experience.
- Implemented WebSocket connections to display real-time API progress and product updates, and refactored the frontend codebase with a scalable structure and consistent coding standards to support future product integrations.

OUR SMART STUDY | FOUNDER

Oct 2020 – Present | Remote

- Founded the ed-tech brand **Our Smart Study**, developing multiple educational mobile apps for students.
- Designed and launched the app **12th Objective Quiz** (built with Flutter), which has **150K+ downloads** on the Play Store.
- Built end-to-end features including mock test engine, notes section, leaderboard, and performance analytics for students.
- Integrated payment gateway, coupon system, subscription flow, and in-app ads to enable monetization.

PROJECTS

INSTA CLONE | FLUTTER, FIREBASE | [GITHUB](#)

- Built an Instagram clone with post uploads, likes, comments, and user auth using Firebase backend.

GOOGLE KEEP NOTES CLONE | FLUTTER, FIREBASE | [GITHUB](#)

- Developed a notes app with Google Sign-In and real-time syncing using Firebase Cloud Firestore.
